How Does Zigbee PRO 2023 Impact Current and Future Products?

Existing Zigbee 3.0 products

Your current Zigbee 3.0 products can continue to be sold on the market without the need to recertify and will remain backward and forward compatible with prior and future Zigbee products

Next Generation Zigbee products

If you are building a new Zigbee product, you should choose the latest available network stack (Zigbee PRO 2023) with the new features from your selected silicon and stack vendors

Updated Zigbee 3.0 products

Recertification is required if you upgrade your existing Zigbee 3.0 product to the Zigbee PRO 2023 network stack from your selected silicon and stack vendors
